

## Active Implementation

### 01. Identify patients

Spirit Implementer carries out the audit on GP Practice clinical systems. This is to identify who meet the agreed criteria as per the clinical protocol for the emollient and barrier cream review.

### 02. Patient and product review

Spirit Implementer audits patient records to confirm suitability for change of emollients and barrier creams.

### 03. Product

Spirit Implementer actions the approved changes and updates the patient's clinical record.

### 04. Communication to patients

Spirit Implementer sends confirmation of changes to patients with information about support available and where to contact if they need help.

### 05. Review outcome

Spirit Coordinator provides a summary to the GP Practice of the changes carried out.
